Jovian Charles Cañedo

Software Developer | Web Applications & Systems Development

jovianchares1210@gmail.com | +63 915 678 7205 | GitHub | LinkedIn | Portfolio

Professional summary

Software developer experienced in building business applications for logistics and transportation operations. Proficient in Laravel, PHP, React, Next.js, TypeScript, MySQL, and AWS, with hands-on experience across backend development, database design, REST APIs, frontend development, and system deployment.

Technical skills

Languages
PHP · TypeScript · JavaScript · Python · C#

Backend
Laravel · Django · Django REST Framework

Frontend
React · Next.js · Inertia.js · Tailwind CSS · HTML · CSS

Databases
MySQL · MariaDB · MongoDB · Firebase

Infrastructure & Tools
AWS (EC2, RDS) · Linux · Git · Docker · Nginx

Architecture & Practices
RESTful APIs · Database Design · Authentication & Authorization · RBAC · Modular Architecture · Workflow Automation

EXPERIENCE

INT Logistics — Davao City, Philippines

Technology Support / Software Development
April 2026 – Present

- Continued development and maintenance of the **LM-Dashboard**, expanding its logistics workflows, reporting capabilities, and operational features.
- Designed and developed a **Transportation Management System** using Laravel, React, and MySQL to manage parcel movement, fleet operations, and transportation workflows.
- Implemented role-based access control (RBAC), authentication, and permission management for different operational roles and hubs.
- Designed and maintained relational database structures and RESTful APIs supporting operational workflows and reporting.

- Investigated and resolved application, database, deployment, and system issues across internal applications.

Freelance Software Developer — Project-based
April 2024 – March 2026

- **Designed and developed the LM-Dashboard from the ground up**, building backend services, database architecture, APIs, and frontend features for parcel tracking, hub operations, delivery monitoring, and performance reporting.
- Built backend services and RESTful APIs using Laravel and PHP, with React/Next.js interfaces for operational users.
- Designed MySQL database schemas for parcels, clients, hubs, tracking events, and operational records.
- Implemented authentication and role-based access control to support different user permissions and operational responsibilities.
- Worked directly with business requirements to translate logistics workflows into software features and operational tools.

Media One Solutions — Davao City, Philippines

Software Developer Intern
May 2024 – July 2024

- Collaborated on the development of **DynaForm**, a dynamic form-building platform using HTMX for real-time interactions and server-side rendering.
- Built a drag-and-drop form builder supporting multiple field types and integrated Google OAuth 2.0 authentication using Passport.js.
- Assisted with backend development using Node.js and MongoDB, focusing on API responses, data handling, and application performance.

SELECTED PROJECTS

Enhanced LSTM-ELU Stock Market Forecasting

Python · PyTorch · FastAPI · Next.js · ApexCharts

- Developed a full-stack time-series forecasting platform using an enhanced LSTM architecture with ELU activation.
- Built a FastAPI backend for model evaluation and API deployment with a Next.js frontend for data visualization.

EDUCATION

Bachelor of Science in Computer Science
University of Mindanao | Davao City, Philippines | **2025**
